

Marco Mondini

Engineering Manager | Product Engineer

📍 Amsterdam, EU Citizen ✉ mmondini@mondspace.com ☎ +31615119237 🌐 mondial7 🌐 mondinimarco

Engineering Manager and hands-on software engineer with 10+ years in product-focused startups and scale-ups, including 5+ years leading engineering teams. Experienced in coaching engineers, improving delivery flow, partnering with Product, shaping technical direction, and building sustainable operating practices across engineering organisations. I combine people-first leadership with strong technical fluency across web, mobile, cloud, data, observability and AI-enabled systems.

Leadership & Engineering Strengths

People leadership & mentoring | Cross-functional product teams & engineering culture | Delivery flow & predictability | Technical direction & architecture | CI/CD & DevEx | XP / Lean / Kanban | Reliability, observability & incident response

Professional Experience

Head of Development · Engineering Lead · Senior Software Engineer 01/2023 – present | Amsterdam, Netherlands
uButler B.V. 🌐

- Promoted twice into broader engineering leadership, owning people, delivery and technical direction in a product-focused environment while remaining hands-on in the codebase.
- Coach engineers through regular 1:1s, feedback, mentoring, hiring and clear expectations; introduced career levels and team practices that reinforce psychological safety, accountability and ownership.
- Improved planning and delivery flow through lightweight KPIs/OKRs, Kanban/XP practices, weekly reporting and information radiators, creating stronger feedback loops and enabling multiple production releases per day.
- Partner closely with Product and company leadership on goals, priorities, roadmap trade-offs and execution; helped clarify ownership and collaboration across Product, Engineering, Data, Design and Operations as the organisation evolved.
- Set and challenge technical direction across web, mobile and internal platforms; led CI/CD improvements, major data migrations, refactoring and developer-experience work across modern and legacy systems.
- Raised operational maturity through observability, incident-response practices, security reviews, risk management, business-continuity planning and compliance/audit readiness.
- Led pragmatic AI adoption across engineering and operations, including production prototypes, retrieval-based workflows and AI-assisted development practices with attention to quality and guardrails.

Engineering Lead · Full Stack Developer · Technical Product Manager 10/2020 – 11/2022 | Berlin, Germany
RIDE GmbH

- Managed and mentored a remote team of 5 full-stack engineers and coordinated delivery with two other hybrid engineering teams.
- Worked closely with Product Managers and designers to turn goals into priorities, refine scope, split work, surface trade-offs and keep delivery predictable.
- Introduced and facilitated XP practices including TDD, pairing, mobbing, refactoring, coding dojos and book clubs, strengthening knowledge sharing, quality and a psychologically safe team environment.
- Stayed a core hands-on contributor while supporting architecture, code reviews, delivery decisions and technical problem solving across TypeScript, React, Node.js, GraphQL and PostgreSQL systems.

Full Stack Developer · Junior Product Manager 10/2017 – 08/2020 | Bolzano, Italy & Remote
Datatellers Srl

- Led development of data-visualisation interfaces and contributed to product requirements, architecture and technical feasibility for greenfield initiatives.
- Modernised and maintained legacy web applications, improved machine-learning-enabled products and built BI/data-analysis tooling.
- Mentored interns remotely and helped establish pragmatic Agile engineering practices across distributed work.

Co-Founder · Mobile Developer · Operations Manager

01/2014 – 01/2016 | Bolzano, Italy

FlashBeing Srl [↗](#)

- Co-founded an early-stage software company; helped shape product and operations, participated in fundraising, and built cross-platform mobile applications. The product reached 5,500+ users in its first month.

Selected Leadership, Speaking & Community

2024 | Adapting to AI - A Startup Engineering Manager's Journey

Industry workshop talk, AiSIS, Utrecht

2024 | Development KPIs & Reporting - Navigating a Multi-Project/Product Environment

Industry talk, Agile Venture Bolzano

2024 | XP2024 Engineering Track Co-Chair

Co-led theme definition, reviews, speaker coordination, agenda and live facilitation

2023 | Time to pair up! Synchronous Code Reviews in Hybrid Teams

XP / Global & Hybrid Work in Software Engineering, Amsterdam

2022 | Towards a Sustainable Remote-First Team Environment: One Pairing Session at a Time [↗](#)

Experience report, XP2022 / Agile Alliance, Copenhagen

2018 | First Being, then Doing. Feeling the Freedom through Agileness [↗](#)

Experience report, XP2018 / Agile Alliance, Porto

2017 | Are Software Startups Applying Agile Practices?

Conference paper, XP2017 / Springer

Education

M.Sc. in Information Processing Science

2019 – 2020 | Oulu, Finland

University of Oulu [↗](#)

European Master in Software Engineering

2018 – 2019 | Madrid, Spain

Universidad Politécnica de Madrid [↗](#)

B.Sc. in Computer Science & Engineering

2014 – 2018 | Bolzano, Italy

Free University of Bolzano Bozen [↗](#)

Technical Breadth

Languages & frameworks

TypeScript, JavaScript, Python, Go, React, React Native, Node.js, GraphQL, REST

Data & cloud

PostgreSQL, MongoDB, BigQuery, GCP, Render, Vercel, Cloudflare, Auth0

Engineering systems

CI/CD, observability, incident response, architecture, DevOps, AI-assisted development, RAG, TDD, pair/mob programming
